EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 10, the status identifier should be changed from "previously presented" to "currently ^{amended} presented", please make the above correction.

Reason for allowance

Allowable Subject Matter

2. **Claims 2-5, 7, 9-10**, are allowed.

3. The following is an examiner's statement of reasons for allowance:

Regarding **claims 7, 9-10**, the present application teaches a crystal for a watch including a keyboard the crystal comprising a central portion of constant thickness and beveled peripheral portion. The beveled peripheral portion, considered as the thinned portion by that has a variable thickness which decreases towards the outside as specifically mentioned on claims 7, 9-10.

The closet prior art such as Hatuse (US Patent 4,257,115) teaches a crystal for a watch including a keyboard the crystal comprising a central portion of constant thickness and beveled peripheral portion. Hatuse teaches the surface of each of the keys of the keyboard spreads over both the central thick portion and also the beveled portion of the crystal. Hatuse does not offer a reliable control especially with a crystal having a thickness sufficiently thick to be water resistant, as the capacitance will vary depending on the location where the user places his finger on the external portion, on the beveled portion or even between the central and the beveled portions of the crystal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
